PROFESSIONAL SUMMARY

Software Developer | Data analyst with hands-on experience in maritime engine-room operations (10+ years at sea) combined with business intelligence expertise. Proficient in Power BI, Looker Studio, Excel and SQL Server, to turn operational data into actionable insights. Empowered with Web Development proficiency, especially JavaScript and PHP, to build interactive website. Uniquely positioned to bridge the gap between maritime domain knowledge and data-driven decision-making for shipping, logistics, and supply chain organizations.

CORE SKILLS

Visualization / BI	Power BI (Intermediate) Looker Studio (Advanced)
Data & Databases	SQL Server (Intermediate) Excel (Advanced) Python (Basic) MySQL (Advanced)
Maritime Domain	Engine Room Operations Fuel Monitoring MARPOL Compliance Vessel Maintenance
Technical	Database Programming Supply Chain Management Graphic Design Data Analytics Full-Stack Web Development
Languages	Bahasa Indonesia (Native) English (Professional)

WORK EXPERIENCE
